

NOT ALL MONSTERS
ARE MASSIVE - THE
MIGHTY MINI.

STRATEGIC MONSTER

Meet the Sentinel SC20: Small in Size, Monumental in Protection. Don't let its compact form deceive you; this little dynamo packs a punch that rivals its larger counterparts. It's the ideal choice for those who demand top-tier security without breaking the bank. Economical yet fiercely effective, the SC20 delivers optimal fog coverage that ensures you're never compromising on your peace of mind.

This ultra-lightweight SC20, weighing under 10kg when installed, is a titan in a compact frame. Envision multiple units, strategically positioned, forming an unyielding security matrix. One trigger sets off a cascading fog, blanketing spaces with dense haze. Despite its minimalistic weight, the Sentinel SC20 offers not just economical security, but also tactical brilliance.

In a world where risks are ever-changing, the Sentinel SC20 offers dynamic, uncompromising protection tailored to fit your unique needs.

PERFORMANCE

- Tiny, but mighty!

FEATURES

- 3-year warranty
- 40 second initial burst for maximum smoke generation in risk critical areas
- Minimum 40 minutes off-mains operational capability
- Energy save mode cuts costs in periods when the generator is not immediately needed
- Supports automatic re-firing via screen-sensor technology
- Extreme temperature operation: -10°C to 50°C
- £10 million product and public liability insurance
- 5 inputs and 8 outputs
- LCD status display and on-board event log.

FUTURE COMPATIBILITY

- IP Upgrade available for link to *Sentience Programme*

CONSTRUCTION

- Rugged and compact steel casing in white / black
- Environmental pack for installation in confined spaces with elevated ambient temperatures
- Machined aluminium is lightweight, and provides industry-leading, rapid heating from cold.

STANDARDS COMPLIANCE

- EN50131:8 and IEC62642:8
- CNPP Rating: Class I Category 30.

FLUID

- 500ml fluid system (*expansion to 5 litres available).

DIMENSIONS

- 33(H) x 12(D) x 23(W) cm
- Weight: 8.5 kg (pre-install), 10 kg (installed).

**WHY
PERFORMANCE
METRICS ARE
BULLSH*T
AND WHY
COMPARING
THEM IS A
WASTE OF
YOUR TIME
AND MINE.**

A peculiarity of the rules that govern security fog machines means that although performance must be tested, the results do not have to be accurately reported. What kind of bullsh*t is that?

We want to change things. (There's more on this topic in our [blog](#), which you can read next time you have a spare half hour.)

So, what are our real, tested performance results?

The SC20 has a performance of 125m³/minute when tested to the EN 50131-8 standards.

Remember: If you put this next to another datasheet, you may not be looking at comparable numbers. Numbers in isolation can only tell you so much, and there are other factors that affect the final outcome. If you really want to find the best security fog machine for you, ring us and talk to an actual human being.
